

Environmental chamber for temperature and humidity tests, for laboratories, volumes of 34, 64 and 100 litres. This **compact, quiet and powerful** material enables you to realise your temperature and humidity tests directly at your workstation.

Humidity diagram

1 Standard

2 Extended humidity range with external dryer

Standard equipment :

- on wheels
- large viewing window with test space light
- standard power supply (single phase 230V)
- one 50 mm diameter porthole
- 1 shelf
- integrated water tank
- air-cooled refrigeration unit
- psychrometric humidity measuring sensor
- TCP/IP interface
- USB interface

Options:

- demineralisation unit
- specific voltage
- additional shelves
- mini supervisor Spirale (see next page)
- etc.

Technical data

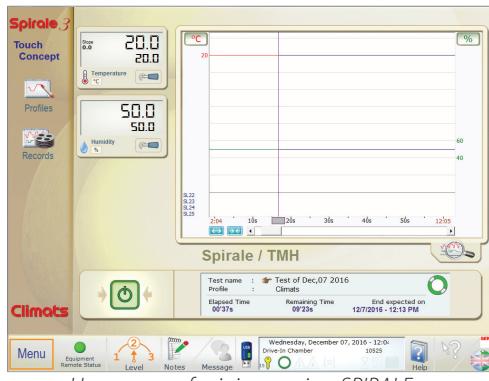

DESIGNATION	TMH 30	TMH31	TMH32	TMH60	TMH61	TMH61	TMH100	TMH101	TMH102						
Space volume (l)	34			64			100								
PERFORMANCE															
Maximum temperature (°C)	+180			+180			+180								
Minimum temperature (°C)	+10	-40	-70	+10	-40	-70	+10	-40	-70						
Cooling temperature variation (°C/min)	6	5	5	5	5	4	5	5	4						
Heating temperature variation (°C/min)	4			4			3								
TEMPERATURE TESTS															
Temperature deviation in time ⁽¹⁾ (°C)	±0.3 to ±1														
Temperature homogeneity in space ⁽²⁾ (°C)	±0.5 to ±2														
CLIMATIC TESTS															
Temperature range (°C)	+10 to +95														
Humidity range (% HR)	+10 to +95														
Temperature deviation in time ⁽¹⁾ (°C)	±0.3 to ±0.5														
Temperature homogeneity in space ⁽²⁾ (°C)	±0.5 to ±1.5														
Deviation humidity in time (%HR)	±1 to ±3														
Water feature for humidity	demineralised water : PH = 6-7; conductivity = 5 to 20 µS/cm														
Consumming water (24h. +40°C / 92 % HR)	2 litres /24h														
TEST SPACE DIMENSIONS (mm)															
Width	350			470			490								
Depth	290			340			405								
Height	310			400			500								
EXTERNAL DIMENSIONS (mm)															
Width	640			760			780								
Depth	930			980			1135								
Depth with optional base frame	750			795			950								
Height	1005			1095			1195								
Height with optional base frame	1685			1775			1875								
SHELVES															
Maximum number shelves	5			7			6								
Minimum height between 2 shelves (mm)	50			50			62								
TECHNICAL INFORMATIONS															
Electrical connection	230V ±10%, 50Hz, 16A														
Weight (kg)	154	-	194	210	230	270									
Weight (with optional base frame) (kg)	200	220	235	250	270	310									
Sound pressure level (dB (A))	56	59	56	59	56	59									
Environmental conditions	from +10°C and +27°C / max HR 75%														

The performance values refer to +25°C.

(1) in center of test space

(2) relative to the set value in temperature range from t_{min} to +150°C

(3) measured in 1m distance from the front and in 1.6m height at free field measurement

Your chamber can be piloted via the mini supervisor SPIRALE (as an option). You can remote control your equipment.

We design and manufacture customized solutions to meet all requirements. Contact us.

Features of the mini supervisor are :

- tests programming,
- automatic launch of cycles tests,
- delayed start and stop
- tests recording
- tracking alarm
- integration of additional measurement options
- multi-languages format software
